

Goet- Insert Coffee Table ● ● ●

Our Stump Coffee Table is a cross cut slab from a solid timber stump which we combine with a metal insert. The metal insert be plated in copper, brass, bronze, stainless steel or be left a raw steel colour. The insert can also be powder coated in a range of colours.

The timber used to manufacture the coffee table has been reclaimed, recycled or is from an easily sustainable source.

Materials

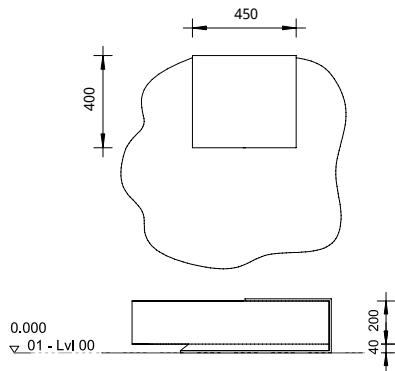

Copper, Brass, Bronze, Stainless Steel
Powder Coating or Raw Mild Steel

Colours

Colours can be determined with client

Technical

+/- 1000mm diameter X 450mm high

* We can customise the material, colour and size according to your specifications.

Jozi Table ● ● ●

The Jozi table reflects our love for the city we live in. Johannesburg of Jozi as fondly referred to is the inspiration for the table. The powder coated steel top is laser cut with a graphic representing the CBD of Johannesburg. This is done through a number of dots representing the street. Some areas, such as Nelson Mandela Bridge and Gandhi Square are highlighted in the graphic. The timber legs are mainly made from Ash, but any suitable timber from a sustainable source can be used. The legs are made up by using three basic legs and then a choice between three shapes for the fourth leg. These shapes represent three iconic buildings that are hand turned into the timber. The buildings represented are The Hillbrow tower, the Brixton Tower and the Ponte building.

Lights ● ● ●

The shapes for the lights are derived from shape around us. For example some of the lights are derived from African pots and then extruded to form the various shapes. Our new range is more linear and interprets the future of South African contemporary forms and direction in design. The lights are manufactured from Jacaranda, but any timber from a sustainable source can be used. The lights can be manufactured to keep the natural quality of the timber or colour can be introduced in various ways.

Couch ● ● ●

This couch epitomizes our design philosophy in that it is design around the use of natural material and combining it with steel. The different elements are kept in simple forms and then combined to form the couch. The timber used is ash but any timber from a sustainable source can be used. The steel elements are kept in a natural state, although they are sealed. The upholstery can be done in leather or fabric of choice. The couch can be ordered in various configurations. This can be done from a two seater to a four seater with or without a corner and a display extension. There is also an option for an ottoman add on.

TV Unit #1 ● ● ●

This unit is manufactured from a solid ash base with a coloured appliance box on top. The base is manufactured from Ash but any timber from a sustainable source can be used. The appliance box is manufactured from MDF and is then sprayed using 2K to a desired colour. The box is closed using Perspex to hide the appliances although the infra-red signal can travel through the cover. The box is also design to accommodate the various wiring elements for the appliances in the box. The leg for the base is constructed from mild steel.
